

NZX Announcement – Results for announcement to the market – 8th July 2008**Cynotech Holdings Limited Half Year Results for 30th June 2008****Profit**

Net profit for the 6 months to 30 June 2008 grew a satisfying 18% to \$1,226,605 (unaudited) compared to net profit for the first half of last year of \$1,039,339.

Net profit for the full year to 31 December 2007 was \$1,806,109.

Assets

Total assets now sit at \$31,613,951 - a 21.5% increase for the six month period over the total of \$26,024,850 at 31 December 2007.

Our growth in new lending has been conservatively constrained in the period to reflect our concerns for overall conditions in the finance market and particularly in the property development sector.

We simply cannot see the point in lending into a business sector where valuations are so unstable and where there is a distinct absence of end purchasers.

Finance Receivables

We have a total of 5,458 loans under management and our maximum loan size (measured on maximum credit exposure to any one group of borrowers) is \$532,061.

We operate on a general maximum loan size of \$300,000. At present we have two exposures in excess of this amount which have been specifically approved by the Board.

Only 2 of our current loans are capitalised interest arrangements. We concentrate on cash flow lending. Our largest 6 loans total \$1,927,839.

Loans which are overdue and held in our salvage ledgers do not have income brought to account until they are put back on to a sound repayment program.

Asset Growth

Receivables growth will be constrained for the foreseeable future as we curtail lending until the finance industry sorts itself out.

We do not expect a return to any sort of normality with the finance company markets until after the end of calendar 2009 and we believe the flow on effects of the devastation in the fringe property development sector will continue long after that.

In the meantime we are concentrating on the collection of the National Finance and Western Bay loan books which we have purchased. The continuing collection of these distressed loan ledgers will provide cash flow and profit opportunities for the foreseeable future.

Bad Debt Provisions

We have taken a very conservative view on bad debt provisioning to ensure that we are considering the impact of the difficult economic conditions. Any loans where payments are overdue by more than 90 days are provided for, with the exception that where the Directors have considered that security can be realised in the present market conditions, then a partial write off has been made.

Total bad debts in this period were \$126,325. In addition a doubtful debt provision of \$577,298 has been created to cover other loans where recovery is uncertain.

Equity Levels

In the current climate Cynotech is fortunate not to have a debenture prospectus and borrowings from the public. Our percentage of shareholder equity at 41.3% of total assets is one of the most conservative of any finance group.

Other funding comes from friends of the company and large shareholders.

Shareholders

We have a base number of very loyal shareholders and we have greatly appreciated their support and contribution to our stability in this economically unstable and trying period. Cynotech will pay its first interim dividend of 0.5 cents per share (one half cent per share) on 13th August 2008 to those shareholders on the register at 5pm on 5th August 2008.

Summary

We have been fortunate to be able to avoid the devastation surrounding us in the finance industry.

- We don't have a debt prospectus or public borrowings to be able to put us under pressure to repay deposits because of a decline in reinvestment rates;
- Our lending is cash flow lending without capitalised interest loans;
- Our self-imposed maximum loan size of \$300,000 ensures that our lending risks are spread over a wide range of clients;
- We are fortunate to have built in future cash flow and cash profit potential from the collection of the distressed loan books which we have purchased and which are on our books at a conservative valuation.

We look forward to the future with confidence and we are confident that there is a profitable future for a well structured finance company operating under a conservative financial model.

Allan Hawkins - Chairman
